SUMMARY

I'm a web development student with background in Maritime Design. I have three years warehouse working experience. The experience of learning my master degree brings me strong mathematics background and dependent self-learning ability which makes me be able to acquire unfamiliar knowledge quickly. I'm looking for an internship of front-end.

SKILLS

- Be able to use Github to develop with other developers
- Familiar with basic knowledge of HTML, CSS and Javascript
- Be able to use React, node.js, MongoDB and Express to develop web app
- Be able to use ROR and Postgresql to develop web apps
- Be able to use different deploying tools including Heroku, Netlify and Railway
- Basic Bootstrap 5 skills
- Good teamwork and collaboration
- Self-Motivated and Dependent learning
